

Employment

Sr. Software Engineer & DevOps **zlabs (zlien.com)** **March 2013 - Present**

- Migrating zlien.com's platform to a microservices based architecture.
- Designing & building zlien's API that ingests 100K+ transactions every week from our customers' systems.
- Designing & building the waivers product that is targeting new segments of customers and is a stepping stone to building collaboration features.
- Reduced release time from an average of 1-2 days, to an average of 3-7 minutes by automating the process.
- Turned the few downtimes a week into 99.9% uptime of the platform for the past 4 years.
- Administrating Git source repositories, defining branching strategies and tutoring a team of 13 about it.

Software Engineer **Inmobly** **January 2012 - May 2012**

- Learned and used Python to develop & deploy backends that recorded video streams and streamed them to two mobile apps through RESTful APIs in under 5 months.

Lead Software Engineer **Wuzzuf.net** **April 2010 - April 2011**

- Designed, and lead the team to implement the software and infrastructure architecture that handles 5 million CVs and 1M+ of job postings.

Software Engineer **Citex Software** **April 2010 - April 2011**

- Reverse engineered on-premise industrial printing system workflow & developed an online drupal system to integrate with it in order to provide online ordering features to customers.
- Created a PHP template engine reducing the amount of templating development work to 20%.

PHP Developer **Media International** **January 2007 - September 2008**

- Developed and maintained various PHP projects.
- Deployed and maintained linux, web, database servers, MySQL replication, and load balancers.

PHP Developer **20at.com** **January 2004 - December 2006**

- A rebellious first of a kind editorial website by youth in the middle east
- Made the system extensible which made it easy to spin off new sub-portals in less than a few days, some times a day. This made it easier for the team to cover major events efficiently fast, and innovatively.
 - Rebuilt the website from scratch and migrated the old data to the new system.
 - My first real world project was a crowd sourcing elections monitoring and reporting platform.

Education

Cairo, Egypt **University of Cairo** **Fall 2000 - May 2005**
